

Growth and Inclusion in the GMS Countries: An Assessment

By

Srinivasa Madhur

Director of Research,

**Cambodia Development Resource Institute
(CDRI), Phnom Penh, Cambodia**

Global Development Network Meeting

Asian Development Bank (ADB),

Manila, Philippines, 20 June, 2013

**(This presentation is based on a
forthcoming paper on the same subject
co-authored with Jayant Menon, Lead
Economist, ADB)**

Two key questions addressed

- How inclusive has growth and development been in the GMS countries?
- What are the key patterns of development inclusiveness emerging across the GMS countries?
- What lessons for making development more inclusive in the future

(The empirical evidences are examined against the backdrop of an analytical framework – not presented here - that defines inclusiveness, explains its many dimensions, and reasons out why it should be the overarching development goal)

GMS, GMS countries, and the coverage of this study

- GMS – Cambodia, Laos, Myanmar, Vietnam, Thailand, China's Yunan Province and Guangxi Zhuang autonomous region)
 - A natural geographic and economic area linked by the Mekong River
 - 2.6 million square kilometers About 326 million people
 - An Average per capita income of about \$1500 (at current exchange rates)
- GMS countries - Cambodia, Laos, Myanmar, Vietnam, Thailand, China – 6 countries
- **This study covers the GMS countries (except Myanmar), rather than the GMS per se**

Looks mainly at the economic, social, and governance dimensions of inclusiveness

- **Economic dimensions - growth inclusiveness :**
 - Growth and structural changes
 - poverty (national, \$1.25-a-day and \$2-a-day)
 - income/consumption inequality
 - income/consumption polarization
- **Social dimensions:**
 - Health
 - Education
 - Social protection, gender equity, and vulnerabilities
- **Governance dimensions:**
 - Governance
 - Democratization
